Changes

v2026.10.30.5: Updated Lesson 1 to require no advance preparation. Japanese and English v5 each contain 27 slides and a five-page in-class handout. Added specimen photographs, a measured chronology and source credits. Sample A is worked through in class before practice on B-D. Lesson 1 videos support after-class review and retain their earlier content pending alignment.

v2026.10.30.4: Applied the specified pronunciations to 17 Japanese video chapters. Expanded the Japanese reading guide to 22 terms, distinguishing valid alternative readings from the pronunciation adopted in this course. Lesson 1 slides and handouts remain v3. Earlier prototype explanations remain under development.

v2026.10.30: Initial publication of eight lessons in Japanese and English.
