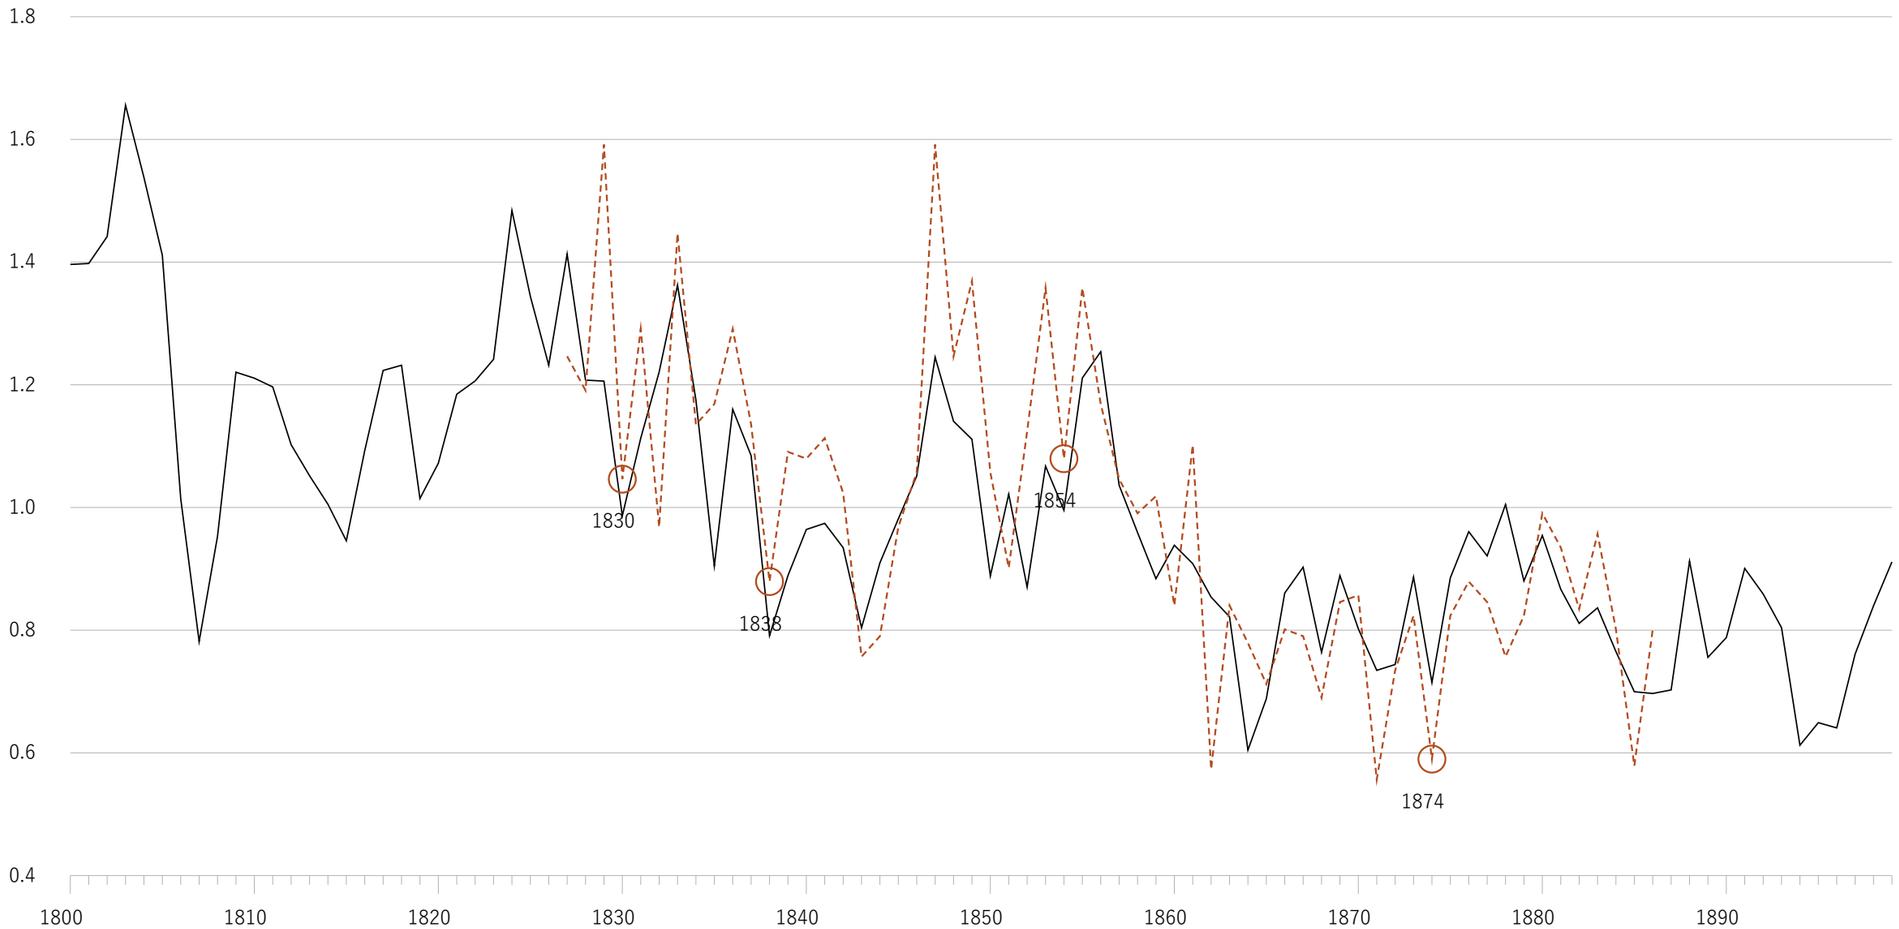
Instructor answer: Sample A covers 1827–1886

Measured Koyamaki series / horizontal scale: 3 mm per year / relative ring width

Print at 100% / actual size. Disable fit-to-page scaling.

Solid: mean of 26 other trees, each divided by its own 1800–1899 mean.

Move the dashed curve 81 mm right: ring 1 aligns with 1827. Circles mark example troughs.



100 mm

Practice with a known-date series; not a stand-alone dating criterion.
